

# READY TO BUY?

Introducing Realty World's Mobile Connect

## Discover, Share, Save and Interact with the Local Real Estate Marketplace.

Yes, we know that you, as a homebuyer do tons of research online. But we also know that you still like to bundle the kids in the backseat and drive around looking at houses and neighborhoods. Your self-guided tours happen at any time of day, any day of the week. Wouldn't it be great if you could put the information of every property for sale right there in the car with you instantaneously?

Realty World's new **Mobile Connect** is a great resource for homebuyers. By using it, you can easily narrow down which properties have the potential to be your dream home. Save time. Save money. Save gas.

Here's how it works: look around neighborhoods that you're interested in. Any time you see a home for sale that you like, pull out your mobile device. We'll immediately send back details, and photos, about that listing and others around it, *no matter who the listing agent is. All you have to do is one of the following options:*

1) Text the letters **RW** in the subject line to the phone number **59559** and it will pick up your location and the property for sale you are viewing.

OR

2) Text the Property Address in the subject line to the phone number **59559** (even if you are not near the home).

It's that simple. Any property for sale, anytime, on your mobile device.

Plus, we will be able to follow up on the properties you text on for more information. We will track the updates, price reductions and more to ensure you are up date in real time on new home opportunities.
